Landscape with `pandoc-latex-environment` and `lscape`

This example illustrates how the `pandoc-latex-environments` filter can be used to generate a `landscape` environment (from the `lscape` package) for presenting page content in landscape format.

```
::: landscape
This content will be in landscape format. It is usually used for large
    images or tables.

![Nam liber tempor cum soluta nobis mazim placerat facer.](image.png)
:::
```

This content will be in landscape format. It is usually used for large images or tables.

Figure 1: Nam liber tempor cum soluta nobis mazim placerat facer.
